**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

# Office Action Summary

**Application No.**

10/656,476

**Applicant(s)**

GARIBAY ET AL.

**Examiner**

CHARLES C. AGWUMEZIE

**Art Unit**

3621

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 07 December 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-33 and 37 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-33 and 37 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-949)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 01/8/04: 03/11/05
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 7, 2007 has been entered.

### **Acknowledgment**

2. Applicants argument filed on December 7, 2007 is acknowledged. Accordingly claims 1-33 and 37 remain pending.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

**Claims 1-11, 12-22, 23-33 and 37**, are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as

originally filed, contains no support for **"such that the customer does not have rights to run the previous version of the software"** (claims 1, 12, 23 and 37). There are new claims without support in the specification. This is the first instance of this invention that is unrelated and unsupported by the original filing. **Cancellation of the new matter is required.**

Applicant's argument dated December 7, 2007 have been considered but are deemed without merit since the applicant argues an invention lacking support in the specification and based entirely on new matter.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

**Claims 1-33 and 37**, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically claims 1, 12, 23 and 37 recites in part: **"...disabling the license key such that the customer does not have rights to run the previous version of the software."** If a software is upgraded or downgraded, the previous version is deemed replaced, or substituted by the either the current upgrade version or the downgrade version. Once the software is upgraded or downgraded, the previous version that is upgraded or downgraded is no longer existing and the user will not have access to the previously existing version prior to upgrade or downgrade talkless of not have rights to run the non-existing software version. Furthermore When downgrading the software to a lower version, it would be obvious that the software key

of the lower version should be used rather than the existing key for the later version. Thus the key for the later version that is being downgraded must automatically be disabled or cease to exist. Another way to look at this is for example you install software version 1.0 with license key 1. You later upgrade the license to version 1.1 with license key 2. Automatically the license key 1 is disabled allowing the new key 2 to function. Assuming you decide to downgrade the software to version 1.0 again the license key 2 will be disabled and allowing the license key 1 to function again. Accordingly the claimed limitation is at best vague and indefinite.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 1-2, 5, 7-10, 12-13, 16, 18, 19-21, 23-24, 27, 29-31, and 32**, are rejected under 35 U.S.C. 103(a) as being unpatentable over Aldis et al U.S. Patent Application Publication 2004/0039916 A1 in view of Stupek Jr. et al Patent No. 5,960,189.

As per **claim 1, 12 and 23**, Aldis et al discloses a method comprising:

maintaining a software license bank for a customer, software licenses stored in the software license bank not being associated with specific machines (fig.1 and 11; 0013, 0014, 0018, claim 61); and

accessing a web application to allow a user to automatically obtain a software license for a specific machine from the software license bank, wherein the software license is associated with a first license key (figs.1, 6 and 7; 0014, 0016, 0017, 0018, 0021, 0023, 0061, 0153).

What Aldis et al does not explicitly teach is

downgrading software associated with first license key including obtaining a second license key and disabling the first license key, such that the customer does not have rights to run the previous version of the software.

Stupek Jr. et al discloses a method comprising downgrading software associated with first license key including obtaining a second license key and disabling the first license key (col. 5, line 65-col. 6, line 45 "...maintaining old versions of upgraded resources allows the user to downgrade the resource if needed in the future....", see claim 29; ....downgrading ...resource from newer version back to old version....).

Accordingly it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the system of Aldis et al and provide the method of downgrading software associated with first license key including obtaining a second license key and disabling the first license key in view of the teachings of Stupek Jr. et al in order to revert to old software version for reasons of compatibility or for any reason for that matter.

As per **claim 2, 13 and 24**, Aldis et al further discloses the method, wherein the software licenses available from the software license bank depend on a predetermined contract (0022).

As per **claim 5, 16 and 27**, Aldis et al further discloses the method, wherein the software license bank contains an unlimited number of licenses for some period of time (fig. 2 and 4, 0078).

As per **claim 7, 18 and 29**, Aldis et al further discloses the method, wherein the web application maintains digital records of software licenses, the digital records indicating rights associated with the software licenses (fig. 2, and 4, 0005, 0015, claim 79).

As per **claim 8, 19 and 30**, Aldis et al further discloses the method, wherein web application can be used to adjust the rights associated with the software license (0022, 0069, 0097).

As per **claim 9, 20 and 31**, Aldis et al further discloses the method, wherein the web application is used to provide license keys for the software (see figs. 2 and 19,

Art Unit: 3621

0077, 0087, claim 40).

As per **claim 10, 21 and 32**, Aldis et al further discloses the method, wherein the web application uses role based security (fig.1; 0021, 0022, 0023).

6. **Claims 3, 4, 6, 11, 14, 15, 17, 22, 25, 26, 28, and 33**, are rejected under 35 U.S.C. 103(a) as being unpatentable over Aldis et al U.S. Patent Application Publication 2004/0039916 in view of Stupek Jr. et al U.S. Patent No. 5,960,189 and further in view of Watanabe et al U.S. Patent Application Publication 2003/0182146 A1.

As per **claim 3, 14 and 25**, both Aldis et al and Stupek Jr. et al failed to explicitly disclose the method, wherein the software license bank stores predetermined dollar amount of licenses.

Watanabe et al discloses the method, wherein the software license bank stores predetermined dollar amount of licenses (figs. 3 and 4; 0038).

Accordingly it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the system of Aldis et al and provide the method wherein the software license bank stores predetermined dollar amount of licenses in view of the teachings of Watanabe et al in order to track number of available licenses.

As per **claim 4, 15 and 26**, Aldis et al and Stupek Jr. et al failed to explicitly disclose the method, wherein the software license bank stores a predetermined CPU count of software licenses.

Watanabe discloses the method, wherein the software license bank stores a predetermined CPU count of software licenses (fig. 3; ...number of license leases...).

Accordingly it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the system of Aldis et al and provide the method wherein the software license bank stores a predetermined CPU count of software licenses in view of the teachings of Watanabe in order to track license usages/limits.

As per **claim 6, 17 and 28**, Aldis et al and Stupek Jr. et al failed to explicitly disclose the method, wherein the software license bank stores a predetermined user count of software licenses.

Watanabe discloses the method, wherein the software license bank stores a predetermined user count of software licenses (fig. 3; 0027; ...number of customers...).

Accordingly it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the system of Aldis et al and provide the method wherein the software license bank stores a predetermined user count of software licenses in view of the teachings of Watanabe in order to track license usages.

As per **claim 11, 22, and 33**, both Aldis et al and Horstmann failed to explicitly disclose the method, wherein the web application stores configuration information for the computers running the licensed software.

Watanabe et al discloses the method, wherein the web application stores configuration information for the computers running the licensed software (0032).

Accordingly it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the system of Aldis et al and provide the method wherein the web application stores configuration information for the computers running the licensed software in view of the teachings of Watanabe et al in order ensure product and/or license compatibility.

7. **Claims 37**, is rejected under 35 U.S.C. 103(a) as being unpatentable over Aldis et al U.S. Patent Application Publication 2004/0039916 in view of Watanabe et al U.S. Patent Application Publication 2003/0182146 A1.

As per **claim 37**, Aldis et al discloses a method comprising:  
maintaining a software license bank for a customer, software licenses stored in the software license bank not being associated with specific machines (fig.1 and 11; 0013, 0014, 0018, claim 61); and  
accessing a web application to allow a user to automatically obtain a software license for a specific machine from the software license bank, wherein the software

license is associated with a first license key (figs.1, 6 and 7; 0014, 0016, 0017, 0018, 0021, 0023, 0061, 0153).

Upgrading/downgrading software associated with first license key including obtaining a second license key and disabling the first license key (0099; 0100; 0105; 0119), such that the customer does not have rights to run the previous version of the software.

What Aldis et al does not explicitly teach is:

wherein the software license bank stores a predetermined dollar amount of licenses.

Watanabe et al discloses wherein the software license bank stores a predetermined dollar amount of licenses (figs. 3 and 4; 0035; 0038; ...unit price of license key lease...made under contract...).

Accordingly it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify the system of Aldis et al and provide the method wherein the software license bank stores predetermined dollar amount of licenses in view of the teachings of Watanabe et al in order to estimate the dollar amount of license keys acquired by the user.

### ***Response to Arguments***

8. Applicant's arguments filed December 7, 2007 have been fully considered but they are not persuasive.

With respect to **claims 1, 12, 23 and 37**, Applicant argues that the prior art of record does not disclose or suggest that the disabling of the first license key is "such that the customer does not have rights to run the previous version of the software."

In response, Examiner submits that first of all the claimed limitation is not in compliance with the written description requirements as shown in the rejection above. Secondly, assuming arguendo, that the claimed limitation is in compliance with 112 first Paragraph written description requirements, it still fail under 35 U.S.C. 112, second paragraph, as being indefinite. This is because when the software is upgraded or downgraded, the previous version that is upgraded or downgraded is no longer existing. It has been replaced or substituted by the version that is used to upgrade or downgrade it. Thus the user cannot and does not have rights to run the software that is no longer existing. Accordingly the claimed limitation is at best vague and indefinite.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference cited to Horstmann U.S. Patent No. 6,009,401 is a document considered relevant to the claimed invention.

**Examiner's Note:** Examiner has cited particular columns and line numbers in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art ad are applied to the specific limitations within the individual claim, other passages and figures

may apply as well. It is respectfully requested that the applicant, in preparing the responses, fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles C. Agwumezie whose number is **(571) 272-6838**. The examiner can normally be reached on Monday – Friday 8:00 am – 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Fischer can be reached on **(571) 272 – 6779**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
